Advice

At PDS&C, we firmly believe that education and awareness is the most effective way of reducing the vulnerability of small businesses to the most common types of cyber crime. Making a few simple changes can help prevent you from having an attack or a breach and can also help you recover more quickly should you become a victim.

Each box below is full of useful information to help you and your business become more cyber aware, this information will also help you to achieve our Digitally Aware or Digitally Resilient Certificates if you choose to take our online assessments.

 <p>AntiVirus & Firewall</p>	 <p>Apps & Social Media</p>	 <p>Backup Data</p>	 <p>Compliance</p>
 <p>Cyber Security Policies</p>	 <p>Disaster Recovery Plan</p>	 <p>Email Security</p>	 <p>Incident Response Plans</p>
