LMF Specialty Market Event
Data and AI Market Breakfast

- 1. Given the London Market's unique position as a hub for complex risks, where do you see the most immediate and high-impact opportunities for AI and GenAI? Are there use cases that are already proving valuable?**
- 2. What are the key barriers—whether regulatory, cultural, or technological—that are slowing AI/GenAI adoption in the London Market? How can firms overcome these challenges to ensure they remain competitive?**
- 3. LMF fosters collaboration across the market—how important is cross-market cooperation in advancing AI adoption? Are there shared challenges that insurers, brokers, and reinsurers should tackle together?**
