

Staying ahead in the digital world

6th September

What is the biggest **THREAT** to you staying ahead in the digital world?

- Environment – climate change and global warming?
- Security breach or ransomware attack?
- AI and the use of Generative AI?
- Industry change?
- Another pandemic?
- Knowledge retention?
- Political instability?
- Regulation and red-tape?
- People challenges – attrition, remote working, development?
- Competition?
- Something else?

For many of our clients their biggest threat was ...

Uncertainty

**Meeting Business
Time-scales**

**Resource Availability /
Experience / Capability**

**Managing Costs /
Budgets**

Adaptability

**Building on Solid
Foundations**

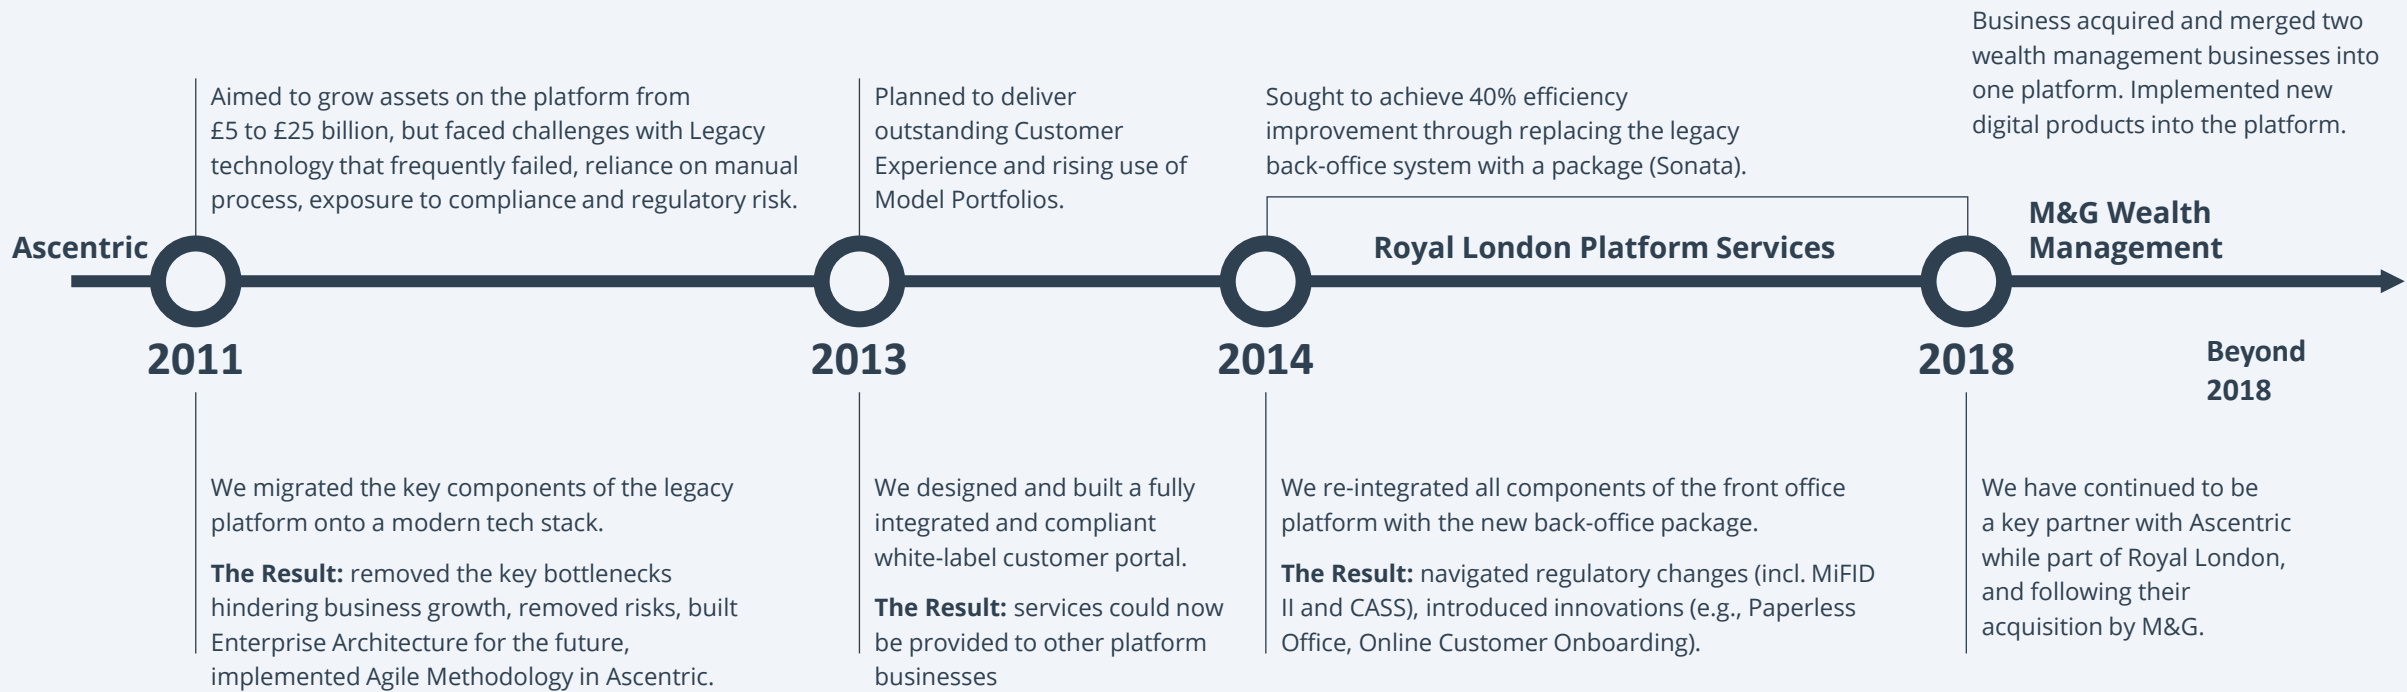

**Change Delivery
Effectiveness**

Transforming an investment platform

ascentric

M&G Wealth Management (previously Royal London Platform Services, and Ascentric) supplies investment administration services, execution only investment dealing, custody services and a wrap platform service through a web-based investment platform.

Supporting a new venture

BLME, Bank of London and the Middle East, is an independent Sharia'a compliant UK Bank and is the largest Islamic bank in Europe

The challenge

BLME wanted to launch the world's first international Islamic digital banking business, Nomo.

The new venture was designed to provide customers with seamless, secure, and Sharia compliant digital banking. The technology was ready, but right at the last minute the business realized that it did not have the requisite processes and procedures to manage incidents and security issues.

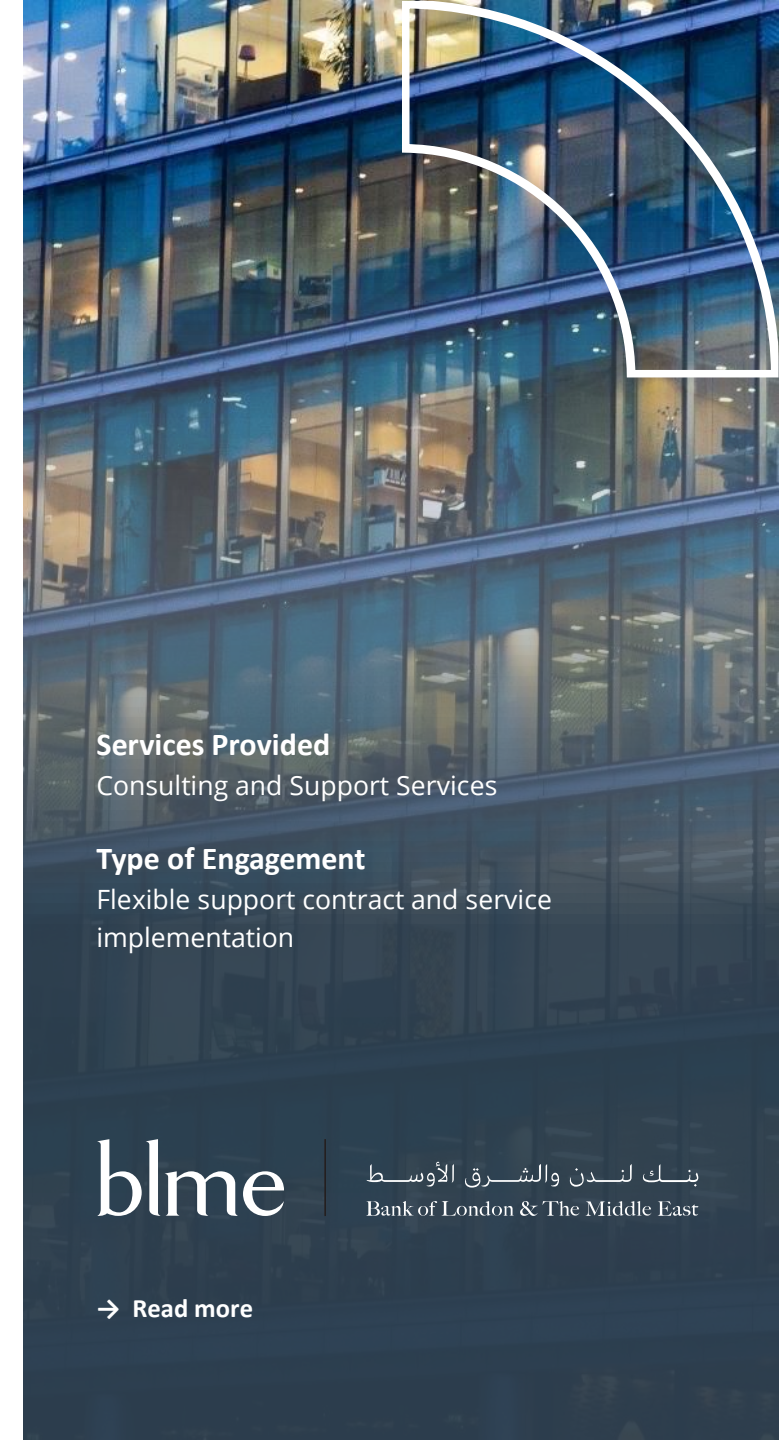

Our Approach

Objectivity performed a review of the technology support capability and proposed the implementation of a multi-skilled DevOps team that would take on the responsibility of setting up all the requisite processes and procedures to manage the launch of the application and the incidents that may arise from such a new venture. We provided a 24/7 team to implement the proper tooling, manage incidents, and keep the technology safe from external threats.

During the process we up-skilled the BLME teams such that they were able to take on the responsibility and execute their chosen insourced model for delivery.

The results

- A successful launch of the new application with no unmanaged incidents
- An up-skilled team from Nomo who have taken on the 24/7 support but in a carefully managed process over 12 months
- An insourced DevOps model for support and maintenance
- Security by design inbuilt into the development processes and release procedures
- An ongoing relationship for advice and support that provides timely suitably skilled technicians when the customer needs them, without the long-term commitment to a large team.
- An adaptable, composable support architecture that can scale appropriately and support the changing requirements of the Nomo business

Services Provided

Consulting and Support Services

Type of Engagement

Flexible support contract and service implementation

Award-winning service

Objectivity has been chosen as the top technology partner amongst Rolls-Royce's 6,000 suppliers

The Supplier Excellence Award is given to technology partners who combine high quality, good value, and a great fit to deliver excellence on time.

Objectivity received Rolls-Royce's Supplier Excellence Award 2021 for demonstrating excellence in 4 key areas:

- **Value for Money**
- **Agility**
- **Excellence**
- **Collaboration**

Having received this award from a valued, long-standing client is a truly distinguished honor, especially as only one such award is granted per year.

How does Objectivity create certainty? We sprinkle the Objectivity magic ...
