*Transformation Director,  
Market & Operations  
Lloyd's*

# Workshop

Opportunities for underwriting and broking

## Workshop

We are all being affected by change in the workplace, mostly driven by fast moving digital enhancements and an ever moving risk landscape, with cyber and climate risk very much presenting opportunities and challenges for the insurance market.

What do you see as having the biggest impact on your current job role and what tools, technologies or changes to business practice/process, would enable you to perform your role even better in this fast changing world - helping you to be more efficient, profitable or provide your clients with a better service.

# Market Innovation in a digital world
